Lightscline
Data Reduction software

Paid Pilot Flyer

Objective

To achieve data infrastructure-related cost reduction for a specific business case using our data-reduction AI software

Features

- ✓ Custom models in pytorch, sklearn, and tensorflow
- ✓ Ability to change hyperparameters (layers, nodes, epochs, etc.)
- ✓ 20 hours of support + 3 hours of onboarding and training
- ✓ Custom features based on use-case
- ✗ No rights to deploy in production
- ✓ Hands-off model development – optional if data can be shared

Key metrics

- ❖ Up to 90% reduction in processing and storage costs
- ❖ Up to 9x reduction in edge compute resource requirements
- ❖ Meeting customer defined metrics

Pricing

Offer!

45-day paid pilot for only $5000

Paid pilot will lead to a discount on an annual contract, effectively making it free of cost*
